Software Intern

Aspire Systems

Jan 2023 - March 2023

Throughout my internship, I learned about Full stack development which include few languages basics of JAVA, MYSQL, PL/SQL, HTML, CSS, JSP. Therefore, I will be able to handle both Front end and back end.

PROJECTS

Insights of TamilNadu Agriculture

(March 2023)

- Here we are used Power BI Tool for data analytics and created Dash Board with the raw data collected from Govt Agriculture Page.
- Language Used: DB/SQL.

Public Health Care System

(September 2021)

- The developed web application serves the needs of both doctors and users. In the event of a new disease outbreak, the application is equipped to promptly send alert messages to ensure timely dissemination of crucial information. I took on the role of project leader

IoT Based Safety Gadget For Child Safety Monitoring & Notification (April 2023)

- This device is designed to track children and notify parents via text messages and phone calls whenever their child crosses a predetermined boundary.
- By investing in this child tracker device, you are empowering yourself as a parent with a powerful tool that enhances your ability to protect your child.
